Also on the support page there should be buttons to download files:

As a logged in Student there should be a button to download:

- 1. A PDF-file which I do not have yet but maybe we can already create the button with a dummy file behind it.
- 2. A software which I can also provide once I have it. As well it would be good to create a dummy file

As a class administrator there should appear another button for another PDF data: the text for that button should be: Lehrer Leitfaden

As a city Admin there should be 2 more buttons for PDF data. The text for that button should be: Stadt Administrator Leitfaden

Surely I would appreciate if you could position the buttons in a way that it looks nice. No need for a sophisticated desing but it should somehow look ok.
